Allowable Subject Matter

1. This action is in response to the after-final amendment filed on July 22, 2005. Claims 1,4-13,16-26,38-30,32-42, and 44-48 are cancelled, leaving claims 14 and 15 in the application. Claims 14 and 15 were objected to in the previous Office action (June 13, 2005) as being "Allowable Subject Matter" and the applicant, accordingly, has written claim 14 in independent form.

2. The following is a statement of reasons of allowance: Claim 14, as amended, includes "designating at least one page in the main memory with a designation; recognizing the designation and, responsive thereto, calling the operating system kernel to encrypt the information."

Even though Herbert explicitly teaches that the encryption/decryption engine is within the physically secure environment and that the real time kernel for secure processor is stored in the secure environment to perform all the basic operations (including encrypting the outgoing pages and decrypting the incoming encrypted pages) to be performed without external intervention (active or passive), Herbert explicitly does not teach or fairly suggest that "designating at least one page in the main memory with a designation and recognizing/calling the operating system kernel to encrypt the information."
